

Orion

About Orion

Orion is a five reel, fifty payline, and on thousand coin slot machine, with:

- A wild symbol
- A scatter symbol
- A Free Spins bonus game

Game Rules

- You can bet up to Twenty coins per payline.
- Malfunctions void all plays and pays.

Wild Symbol Rules

- The **Portal** symbol is a wild symbol.
- Creates a wild symbol stack
- Does not substitute for the scatter symbol.
- Does not create its own winning combination when multiple symbols appear in a line on an enabled payline.
- Only one winning combination is paid out per payline. If there is more than one possible winning combination on a payline, you are paid out the value of the highest combination only.

Scatter Symbol Rules

- The **Orion Logo** symbol is a scatter symbol.
- Completes a winning scatter combination when three or more appear on the reels.
- Cannot be substituted by the wild symbol.
- Scatter wins are calculated by multiplying the scatter symbol combination payout by the total number of regular coins bet.
- Scatter wins are added to regular wins. If you have a scatter win and a regular win you are paid out for both wins, as the scatter symbol does not need to appear on enabled payline to win
- Three or more **Orion Logo** symbols scattered on the reels, activate the Free Spins bonus game.

Free Spins Bonus Game Rules

- Three or more **Orion Logo** symbols scattered on the reels, activate the Free Spins bonus game.
- You are awarded eight free spins.
- All the bets and paylines played in the free spins are the same as the spin that activated the bonus game.
- During the free spins
 - The **Portal** symbol is wild symbol stack
 - If a wild symbol is displayed in on the reels, it moves up or down to complete all positions on the reels with the wild symbol stack.
- Free spins can be re-activated during the bonus game.
- Scatter and bonus wins are added to regular wins.
- Winnings are automatically collected during the bonus game.

Betting and Payout Rules

- Winnings are paid out on the highest combination on each enabled payline only, except for scatter wins.
- Winning scatter combinations can appear in any position on the reels.
- Scatter and bonus wins are added to regular wins.
- Regular winning combinations pay out from left-to-right, so at least one of the symbols must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out. The symbol must be next to each other on an enabled payline.
- All payout tables display the number of coins that are won for each combination. The total number of coins paid out depends on the number of coins you played per payline
- Regular wins are calculated by taking the number of coins won, multiplied by the number of coins you played per payline.
- Scatter wins are calculated by multiplying the scatter symbol combination payout by the total number of regular coins bet.
- The number of credits won is dependent on the total number of coins won, multiplied by the number of coins size you select.
- The formula to calculate the conversion of your coins to credits is: number of coins x coin size played = amount in credits.
- Malfunctions void all plays and pays.
