Shooting Stars – shooting stars slot

Asteroids, red and blue stars and planets with rings in the infinity of space – Shooting Stars reveals the beauty of the night sky and gives you many winning chances. If you can witness the expansion of a star countless winnings are yours!

Bonus symbols

The blue STAR is the WILD symbol, which only appears on the 2nd, 3rd and 4th reel and replaces all other symbols in the shooting stars slot.

Shooting-Star-Bonus

If the blue STAR (WILD symbol) lands at least once on the 2nd, 3rd or 4th reel, it triggers the Shooting-Star-Bonus. Once this bonus has been triggered blue STARS also appear on the remaining positions of the relevant reel. These will be fixed in place, while the other reels spin again. If another blue STAR lands it expands to the other reel positions and will also be fixed in place.
